Education

University of Texas, Austin - Coding Boot Camp   2022
- Completed 24 week intensive boot camp focused on creating websites and apps from the starting wireframe to deployment.
- Learned agile and scrum methodologies and how they apply to software engineering teams.
- Built a number of projects on my own and became excited and interested in working on frontend applications with React.

Projects

This Weekend - Guide to Portland, OR skate spots. **Repo Link**
- Technologies: React, HTML, CSS, Javascript MongoDB and Heroku.

Wine Iist - A wine Index that provides all the wines information using CRUD operations. **Repo Link**
- Technologies: React, HTML, CSS, JavaScript, Mongodb, Express & Node.js.

The Newport House - Private beach house rental Newport, OR. **Repo Link**
- Technologies: React, HTML, CSS, JavaScript, EmailJS and Heroku.

Experience

Flat Track Coffee - Manager   '20 - '22
- Served as the manager of 7 employees at Flat Track Coffee, including onboarding and training.
- Managed wholesale accounts of all paper goods, food suppliers and retail coffee ordering.

TileBar Espresso - Owner & Operator   '15 - '21
- Created a mobile espresso catering business, serving high-quality specialty espresso at events, including:
  - Setting up the business and getting everything up to Arizona's unique legal code.
  - Marketing and growing an initial clientele, serving thousands, across 100+ events.
  - Source products from local coffee roasters and tea makers to build and support local business.
- Created our website, my first step into web development.

Professional Skateboarder   '10 - '16
- I lived in LA for a number of years to pursue my career in skateboarding. Spent my time working with many companies, traveling and making video content.
